Let Rego Be Your Guide

Rego's Clarity to Rally Connector

Integrate Clarity Roadmaps to Rally Initiatives for Real-Time Visibility

Do your teams use multiple projects and track capacity in ways that are unfamiliar to business sponsors and executives? Is this causing a disconnect between strategic leaders and development teams?

With just one click, Rego's Clarity Roadmap to Rally innovation seamlessly connects the planning process directly to the development process. This connector also synchronizes information to your Rally portfolio items for real-time updates in the Clarity Roadmap.

Value to You:

Creates visibility throughout the development lifecycle.

Planning at the Roadmap level leverages the actual capacity of teams in Rally

Clarity is populated from Rally status and updates, giving leadership an accurate picture of progress directly from the Roadmap

Automated integration takes the approved and selected work items from the Clarity Roadmap and adds them to the product backlogs, eliminating double entry and the opportunity for errors

Optimize Planning and Agile Development with Rego's Clarity Roadmap to Rally Innovation
